# Capability Statement

FARADAY
SOFTWARE

8618 Brook Rd
McLean, VA 22102
www.faradaysoftware.com

Core Competencies

- Custom Development and Integrations
- System and Enterprise Architecture
- Data Analytics, Business Intelligence, and Visualization
- AI, Machine Learning (ML), including Large Language Models (LLM)
- Low-Code Delivery, Implementation, and Assessment
- Agile Center of Excellence and Governance

Differentiators

- Specialized in Data-Driven Solutions, Including AI/ML and Analytics-Enabled Workflows
- Certified Experts Across Low-Code, Cloud, and Emerging Technologies
- Strong Past Performance Supporting Federal Civilian and DoD Agencies
- Trusted Agile Delivery Partner with Deep Expertise in Scalable, Secure Implementations

Past Performance

Project: Integrated Defense Enterprise Acquisition System (IDEAS) Modernization
Description: Partnered with Appian Corporation to provide Tier 2/Tier 3 support for IDEAS, an acquisition management system for IT and services developed for DISA. Faraday's key resources lead the O&M effort to maintain and enhance IDEAS, and provide technical expertise in systems integrations in the Procurement Integrated Enterprise Environment (PIEE) ecosystem.

Project: DOL Wage and Hour Division Case Management System
Description: Faraday provides architecture and development support for the modernization of WHD's enterprise case management system, streamlining wage determinations, exception approvals and labor law enforcement. The initiative consists of replacing legacy WHD applications with modernized case management applications using low-code application development and workflow automation.

Project: AFOSI Case Management System Modernization
Description: Supported the development of ORION leveraging Appian low-code application development and workflow automation. ORION enables the tracking and management of criminal investigations, intelligence operations, and counterintelligence efforts, providing a centralized platform for case management and decision support.

Company Data

Faraday is an established and trusted Appian Partner and Reseller, supporting government digital transformations since 2014.
We specialize in low-code modernization and data-driven solutions, leveraging best practices to deliver exceptional results for our commercial and government customers across industries, including military, FedCiv, pharmaceuticals, banking, finance, and aerospace.
